

Double MSc Degree in Mechatronics

**MSc cooperation programme between
FHV Austria and UiA Norway**

The Double Degree Programme in Mechatronics

The Double Degree Programme (DDP) is:

- A 2-year MSc programme (120 ECTS) in Mechatronics for MSc students at FHV, University of Applied Sciences and the University of Agder, Faculty of Engineering and Science (UiA).
- Based on the MSc programmes in Mechatronics at FHV and UiA.

Students enrolled in the DDP programme will:

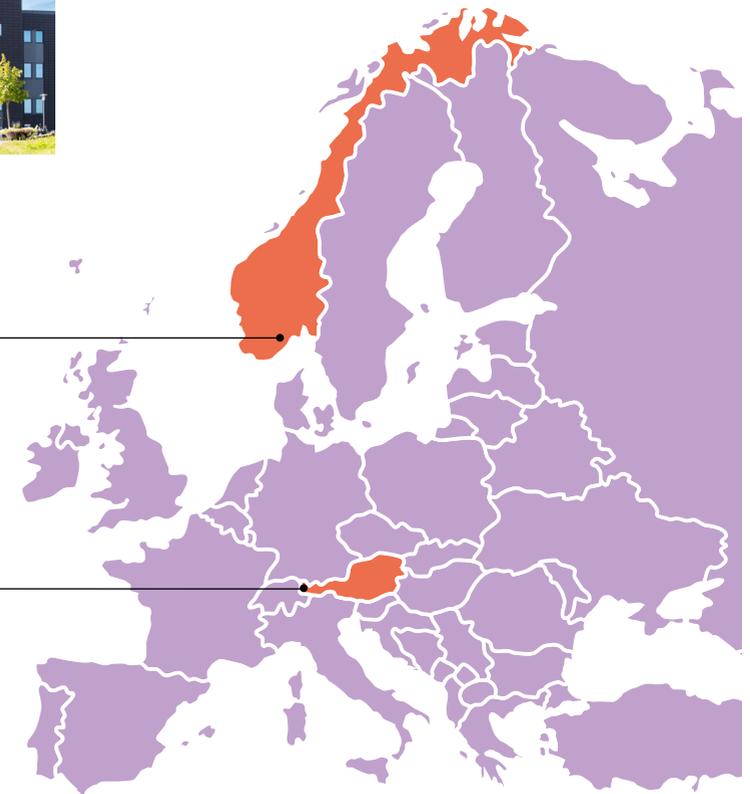

- Study the first 2 semesters (semester 1 and 2) of the MSc programme at the home university.
- Study the 3rd semester at the host university.
- The 4th semester, the thesis project semester, is a joint project semester supervised and examined by both universities. DDP students can undertake the thesis project semester at either home or host university. The main supervisor will be nominated at the university the students perform the thesis project with a co-supervisor from the other university.

Students who successfully complete the DDP programme and pass 120 ECTS credits are awarded the **Master of Science degree** from both partner universities.

Grimstad, Norway

Dornbirn, Austria

Double your benefits:

Further your career by getting the Master of Science degree from two excellent universities in Austria and Norway.

Get a special MSc degree as each of the two partner universities add their unique master's courses to the MSc Double Degree programme.

Be better prepared to work in the global engineering market.

Gain international experience.

Expand your network of friends and colleagues.

Be more competitive in the global work market.
